

Jack Gloyer

Software Developer

Hello! I am a recently graduated full-stack software developer with a knack for problem-solving and collaborating as a team. I completed 17 weeks at Dev Academy Aotearoa and am looking to put my skills to the test in the industry.

EXPERIENCE

Dev Academy Aotearoa, Auckland — Student

June 2024 - October 2024

- 17 weeks, intense bootcamp. Creating projects or refining new skills in a team and work based environment. Totalling roughly 800 hours, this course exposed me to a full stack of TypeScript, React.js, Tailwind CSS, Node.js, Supertest, SQLite (Knex), Express and Superagent.
- Daily participation in collaborative teams, either in pairs or larger groups. These often simulated an Agile methodology. Together with a focus on developing interpersonal skills such as courageous conversations, active listening, nonviolent communication, giving and receiving feedback and reflection, prepared me to excel at collaborative project work and an excellent base to further my skills from.
- See my team's deployed final project here: [pawpals](#)

Te Motu Vineyard, Waiheke Island — Vineyard Hand

February 2024 - June 2024

- Here I, as someone who has worked here before and had prior experience working a vintage, helped train newer members of staff.

Alba Bar & Deli, Brisbane — Junior Sous Chef

February 2023 - December 2024

- My time here culminated in continuing a three year streak of winning Best Bar Food in Australia 2023, me and two other chefs managed to produce amazing dishes from a tiny kitchen space.
- The head chef took me under his wing and mentored me through learning on the fly and on-site, rapidly adapting his techniques during busy periods. Communication here was key.

EDUCATION

Dev Academy Aotearoa, Auckland — NZQA Level 6 Certificate

June 2024 - October 2024

Auckland University of Technology, Auckland — Certificate in Communication and Information Science

March 2017 - December 2017

SKILLS & TECH STACK

- React.js
- SQLite & Knex
- TypeScript
- HTML
- CSS
- Supertest, Superagent
- Express
- Collaborative Team Projects
- Agile Methodologies

PROJECTS

- [pawpals](#)
A meetup-inspired social media site based around creating a profile for you and your pets, then either attending or creating gatherings in your area. React, Tailwind, Databases.
- Snakes on a garlic
A single day group project, with about 7 hours to code and plan a presentation. This one grabs different movies from a movie database and displays them based on keywords. APIs, Full-Stack.
